Professional Experience

2021 – 2022

Akure

Lead Designer, iLearnBlock

Crypto education platform

- Designed the entire e-learning platform, including IA, course flows, dashboards, and learning modules.
- Built the design system and brand language from scratch.
- Improved user comprehension and module completion through intuitive layouts.

2022 – 2023

Akure

Lead UX Designer, Dotcircle Labs

Software engineering agency

- Led UX for client products across fintech, SaaS, and Web3.
- Delivered wireframes, high-fidelity designs, and interactive prototypes.
- Worked with engineers to implement efficient, scalable UI systems.

2023 – Present

remote

Lead UX & Frontend Developer, Mythweaver

AI-powered TTRPG manager

- Designed core features for AI-driven campaign management, story tools, and worldbuilding interfaces.
- Developed the product's design language and interaction models.
- Built complex flows for LLM integration and dynamic content generation.

2023 – 2024

remote

Lead UI Designer, Rethinkable

Web3 job recruitment platform

- Designed UI for talent matching, recruiter dashboards, and crypto-native job flows.
- Implemented a scalable design system for the platform.
- Improved job application UX and reduced user drop-off during onboarding.

2025 – Present

remote

Security Researcher, Sherlock

- Analyze codebases for vulnerabilities, invariants, and exploit paths.
- Participate in competitive audits
- Write detailed reports with reproducible proofs-of-concept.

2025 – Present

Developer, *Built chat clipper*

- Designed and developed Chat Clipper, a tool for exporting AI chat snippets (ChatGPT, Claude, etc.) using text selection or message click detection.
- Implemented code-block parsing, clean formatting pipelines, and shareable export features.
- Built extension–web app integration, including authentication, saving flows, and backend schema design.

Education

02/2018 – 09/2024
Akure, Nigeria

Bachelor of Technology, *Federal University of Technology Akure*

Skills

- UX/UX Design
- Design Systems
- Information Architecture
- Smart Contract Security
- Threat modeling & economic analysis
- Analytical thinking
- Problem-solving
- Clear communication
- Research & documentation
- Figma, HTML, CSS, JS, Solidity, Move

Languages

English

Fluent

Professional Summary

Product designer turned blockchain security researcher with experience leading design teams across AI, Web3, and SaaS companies. Currently focused on smart contract security, DeFi mechanics, and protocol risk analysis. I combine deep user-centered design skills with analytical thinking and on-chain problem-solving to deliver secure and intuitive systems.

Awards

2025

Top Emerging Security Researcher, *Sherlock*
